

300' max between devices

120 ohm data cable  
-Belden 7201A  
-Proplex PC224T

The maximum recommended length of an entire DMX run is 1000'.  
Longer runs can be achieved using a DMX repeater.  
The maximum number of devices on a DMX network is 32.  
Install a DMX terminator at the end of the DMX run.  
Each Ilumiline 21 IP draws a maximum of 30W.

This fixture requires the Ilumicode remote addresser to change the starting address, change the personality, change the dimming curve, or to set the fixture to operate on a static program.

This fixture can project a static scene in the absence of a DMX controller.
